Response to Amendment

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on November 12, 2003 has been entered.

Applicants' amendment, filed on October 3, 2003 has been entered and made of record. An action on the RCE follows.

Remarks

2. Applicant's arguments with respect to claims 1-9, 11-12, and 14-15 have been fully considered, but they are not persuasive.

a. Applicant argues that Ohsawa teaches extraction DCT coefficients based on a set enlarge/reduction ratio and then IDCT based on the extracted coefficients, thus OHSAWA fails to disclose or suggest processing all of the orthogonal transformation coefficients to generate expanded image data.

However, Ohasawa teaches the extraction DCT coefficients based on a ratio Z . Z can be large than 1 (See fig. 22, $Z > 1$), thus, in $Z > 1$, result of extraction will be more than **all** of original coefficients (col. 19, lines 49-52). Therefore, Applicant's assertion is wrong.

Art Unit: 2623

3. The detailed rejection of claims 1-9, 11-12 and 14-15 is addressed with regard to paper #6 and for limitation of all of orthogonal transformation coefficients, the discussion are addressed with regard to remark .
4. claims 10, 13, and 16 are allowed.
